

## Helping Seniors Stay Safe and Independent!

### Primary Services

#### Personal Alert Service

With the push of a button, you will receive the help you need any time during the day or night.

Our Care Center Monitors are there for you during emergency and non-emergency situations. They offer both security and peace of mind so you can continue with your daily activities and maintain your independence.

#### Live-In Service

We provide short and long-term live-in home care for elderly, chronically ill, or disabled clients. As a licensed home health aide agency with the State of Connecticut Department of Public Health, all of our staff are thoroughly referenced and screened. They are also supervised regularly by registered nurses.

As part of our services, we conduct a free, full nursing assessment on each of our clients. We also offer on-call accessibility to our nurses 24 hours per day, seven days per week.

### Other Services

#### Home Health Aides

*(Short or long-term available)*

Our Home Health Aides provide everyday care from bathing and dressing support to meal preparation.

#### Homemakers

Our Homemakers are perfect for those who could use a little extra help around the house. Services include laundry, light housekeeping, shopping, and meal preparation.

#### Assisted Transportation

We have two cars and a wheelchair-accessible van available to help you get to and from doctor's appointments, the store, and/or to visit a friend or relative.

#### Home Modification

Our experienced carpenters can help you make your home safer and more comfortable by installing grab bars, wheelchair ramps, decks, handrails, and other safety and accessibility modifications.

**Family &  
Children's**  
AGENCY

Family & Children's Agency can help you or your loved one get high-quality care at affordable rates. As a local non-profit provider, our services are based on a sliding scale.
